EDUCATION

Indian Institute of Engineering Science and Technology, Shibpur <i>B.Tech in Information Technology — CGPA: 9.01/10</i>	Howrah, India <i>Aug 2023 – Aug 2027 (Expected)</i>
H N S M Academy <i>Higher Secondary (UP Board) — 81.2%</i>	Jaunpur, India <i>2022</i>

SKILLS

- **Programming Languages:** C++, Java, Python, JavaScript, TypeScript
- **Frontend:** React.js, Next.js, React Native, HTML, CSS, Tailwind CSS, Redux Toolkit
- **Backend:** Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, Socket.io
- **Databases & Caching:** PostgreSQL, MySQL, MongoDB, Redis
- **Cloud & Dev Tools:** Git, GitHub, AWS EC2, Cloudinary
- **AI & Machine Learning:** Scikit-learn, TensorFlow (Basics), RAG, LLM Integration, Agentic AI
- **Core CS:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Object-Oriented Programming

EXPERIENCE

Frontend Engineering Intern | mVuew May 2026 – July 2026

- Developed a global news platform using **Next.js** and **Tailwind CSS**, building **15+ responsive UI components** and reducing page load time by **20%**.
- Built a secure **Firestore Authentication** flow and premium paywall to protect subscription-based multi-country news content.
- Integrated an embedded **FM Radio** player, increasing average user engagement by **30%**.

App Developer | Graho Freelancing

- Built end-to-end features for a **React Native** astrology app, including chat, wallet management, and astrologer consultation flows.
- Developed a **FastAPI** RAG-based chat engine using user history, persona context, and Kundli data for personalized AI responses.
- Improved chat experience with delayed multi-message AI replies for more natural conversations.
- Implemented wallet validation and insufficient-balance handling, preventing invalid consultation sessions.

PROJECTS

Disposable Email Service | Node.js, Express, PostgreSQL, Redis, SMTP GitHub

- Built a **disposable email platform** by engineering a custom **SMTP server** to receive, parse, and securely store temporary emails.
- Developed secure **REST APIs** using **Express, PostgreSQL, and JWT** for mailbox management, authentication, and session handling.
- Improved performance using **Upstash Redis** caching, integrated **Cloudinary** for file attachments, and automated mailbox cleanup with **CRON jobs**.

Automated Security Posture Platform | Node.js, FastAPI, Next.js, MongoDB, Redis Live

- Engineered a **9-service microservices** platform for automated security assessments across **repositories, cloud infrastructure, dependencies, TLS endpoints, and secrets**.
- Designed a **weighted risk correlation engine** that aggregated findings from multiple security scanners to generate **prioritized attack paths**.
- Built a real-time **SOC dashboard** featuring **live scan telemetry, AI-assisted vulnerability analysis, automated PDF reporting, and secure WebSocket-based remote VM agents**.

ACHIEVEMENTS

- Achieved the **Pupil** rank on **Codeforces** with a peak rating of **1248**.
- Solved **600+ problems** on competitive coding platforms (**LeetCode, GeeksforGeeks & Codeforces**).
- Won the 1st prize at **Hacksprint**, a national level hackathon, held at **Instruo, IEST Shibpur**.
- Participated in **CodeforGood 2025** Hackathon at **JPMorganChase & Co.** Worked with team to solve a real-world problem faced by **PANS Foundation**.
